

Web Development at ApartmentLove.com

Thanks for your interest in our Web Development division!

We at ApartmentLove™ are in a very exciting time of our development. Having just recently (July 2015) launched our website we're adding supporting features and building out additional functionality at warp speed! We're frantically trying to catch up to an industry that's older than the internet itself while trying to add new and additional functionality that will grow and expand the scope and capacity of the market on a daily basis.

Working with our chief designers and concept engineers as well as our front line Customer Solutions team and our Sales and Marketing divisions, you'll be exposed to all aspects of the business. Managing projects that range from leading new product launches to improving process flows that streamline and bolster the user experience, the role of the Web Development team is an incredibly important one.

From maintaining the integrity and quality of our digital assets to constantly seeking new ways to speed and accelerate the sales cycle for our customers, the Web Development team is of vital importance to the continued growth and expansion of our site and our competitive positioning in a fast moving and fiercely competitive global industry.

In order to be successful as a member of our Web Development team, you'll need to:

- See more than just the code but rather the big picture and understand what it is,
- Work and communicate well with each of the Company's other divisions,
- Understand that client needs supersede all other development work before you.

The role of the Web Development team is nothing short of vital to the health and sustainability of our business. If you're interested in challenging our most direct competitors in the open market by being more responsive, more efficient and more effective than they ever could be, send your resume to our careers team at careers@apartmentlove.com.

Please make sure to set the subject of your email to "Web Development" and in addition to providing sample of your work, take a moment and tell us what experiencing "Apartment Love" has been like in your own life too.

Yours truly,
